CMIT Solutions to have grand opening Thursday

MATTHEWS — Small to mid-sized businesses in the south Charlotte and Union County area have a new partner for their information technology needs: CMIT Solutions, a provider of managed services and IT support. The company will have a grand opening event at the Matthews Chamber of Commerce office, 210 Matthews Station St. from 7:30 a.m. to 9 a.m. on Thursday.

For a small business owner, frozen servers, frequent viruses,

disabled e-mail and inadequate technical support can be an ulcer-inducing nightmare of lost productivity and vanishing profits. "It doesn't have to be that way. Technology should be a strategic asset — not a liability," Indian Trail resident Emory Simmons, owner of CMIT Solu-

Simmons

tions, said in press release. CMIT Solutions recently opened in the south Charlotte and Union County area. "Business owners tend to call us when their systems are failing and other providers aren't giving them the service they need."

Whether it's removing spyware from company servers or helping companies develop software solutions to handle growth, CMIT Solutions knows the challenges facing small business owners. Not only are CMIT franchise owners

small business executives themselves, but they focus almost entirely on businesses with fewer than 100 employees.

"These businesses have the same needs as larger ones, just not in the same volume," Simmons said.

CMIT Solutions has built a national organization by partnering with industry giants like Dell, Microsoft, Cisco, Symantec and Intuit.

"We provide peace of mind," Simmons said. "We want our cli-

ents working on growing their business, not worrying about their computers."

Business owners or representatives who attend Thursday's 16 grand opening event automatically qualify their companies for a free IT infrastructure assessment from CMIT Solutions. Call 704-234-2648 or e-mail esimmons@cmitsolutions.com for more information on the event, to schedule an assessment, or to learn more about CMIT Solutions.
