

CMIT's Backup and Disaster Recovery Solution

cmIT Guardian
Protecting Your Business

CMIT Guardian, the fastest and most economic way to secure your company's computer systems data.

CMIT Guardian is an affordable flat-rate disaster recovery and protection plan that enables company leadership and hard working employees to be assured that their important computer files are safely guarded no matter the circumstances that may occur.

Among the many benefits to businesses, the most important is that when disaster strikes and office computers are unavailable CMIT Guardian provides business owners and their employees the ability to work with their data from any computer with an internet connection.

Emergency planning for small and medium-sized businesses is a must. Unfortunately, businesses can be destroyed overnight and without critical data backup and ongoing protection, businesses are taking a risk with their future.

FACT 1 - 20% of small to medium businesses will suffer a major disaster causing loss of critical data every 5 years.

(Source: Richmond House Group)

FACT 2 - 7 out of 10 small firms go out of business within a year if they experience a major data loss –

(Information Security Breaches Survey, DTI/PriceWaterhouse Coopers)

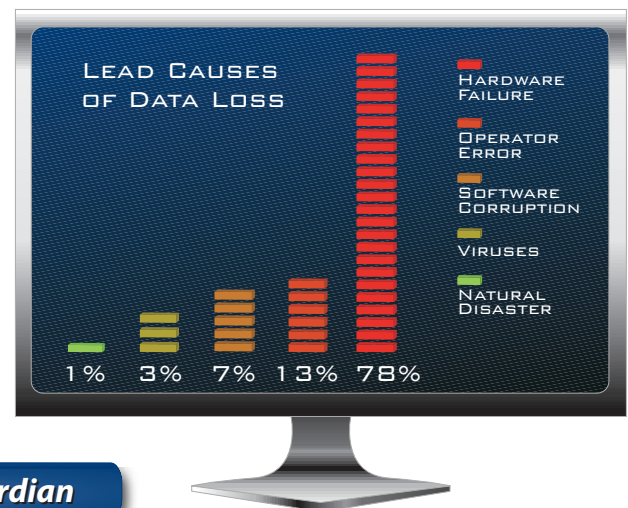

FACT 3 - Companies experience an average of 501 hours of network downtime every year, and the overall downtime costs an average of 3.6% of annual revenue.
